NEW COLORCUTTER® ILLUMA™ FINISHING MARKERS™

**THE FIRST TO CUT & DECORATE PERFECT FINISHED EDGES ON DARK
PAPERS**

(Davie, FL) – Gizmo Enterprises, Inc. is expanding its product line of ColorCutter® Finishing Markers™ with innovative and useful “ILLUMA™” markers, the first Finishing Markers™ to cut and decorate perfect finished edges on **dark** and light papers. ColorCutter® Finishing Markers™ have a razor sharp cutter in the middle of the marker tip. The patented “razor in tip” technology allows ColorCutter® finishing markers to cut and color finished edges on papers, photographs, vellums and other material in one step.

ColorCutter® Finishing Markers™ have won national awards and been selected by editors of Vamp Stamp News and HGTV as “editors picks”.

The ILLUMA™ line is available in four new vivid colors – pink, blue, violet and orange. These colors turn vibrant after approximately 30 seconds when used on dark papers and also decorate beautifully on light colored papers. The ink is permanent, pigmented, acid-free and non-toxic for a fabulous, long-lasting finish on all your projects. The retail price of each color is \$5.99.
