**CUT & DECORATE METAL FOILS & PLASTIC SHEETS WITH NEW
COLORCUTTER® MP FINISHING MARKERS™**

(Davie, FL) – Gizmo Enterprises, Inc. is expanding its product line of ColorCutter® Finishing Markers™ by introducing the first Finishing Markers™ to cut and decorate perfect finished edges on thin metal foils, plastic sheets, mylars, veneers and more. The ColorCutter® MP line of ColorCutter® Finishing Markers™ have a razor sharp cutter in the middle of the marker tip.

“You literally draw shapes into metal foils and pull the colorful edged shapes out of the page” said Teri Kaye, Executive Vice President of Gizmo Enterprises, Inc. The patented “razor in tip” technology allows ColorCutter® finishing markers to cut and color in one step.

The original line of ColorCutter® Finishing Markers™ have won national awards and been selected by editors of Vamp Stamp News and HGTV as “editors picks”.

The ColorCutter® MP line is available in three colors – Black, Red and Blue. ColorCutter® MP ink is alcohol-based, permanent and pigmented for a high quality lasting finished look. The retail price of each color is \$6.99.
